Microsoft Corporation  
Internship Program Recruitment Team  
Microsoft Careers

Dear Microsoft Recruitment Team,

I am writing to express my sincere interest in the Software Engineering Internship at Microsoft. As a B.Tech student in Electronics and Communication Engineering at NIT Silchar, I am eager to apply my skills in front-end and full-stack development within a globally impactful and innovation-driven environment.

Microsoft's core values—especially its emphasis on a growth mindset and empowering every person through technology—deeply resonate with me. I strive to adopt a similar approach in my projects. Whether developing mobile-first solutions using Flutter and Firebase or building responsive web apps with React, HTML/CSS, and JavaScript, I've constantly pushed myself to solve meaningful problems through technology. Recently, I've expanded into full-stack web development using Node.js, Express, and MongoDB to build applications that are scalable and user-focused.

Though still in the early stages of my career, I have developed and led projects such as a real-time travel planning app and an event management platform for my campus E-Cell. These experiences have sharpened my ability to collaborate in agile teams, design accessible user interfaces, and write modular, maintainable code. My hands-on experience with tools like Git, REST APIs, and state management reflects my readiness to contribute to live codebases and evolve through mentorship and feedback.

What excites me most about this opportunity is the chance to learn from Microsoft engineers while contributing to products that shape industries and empower millions. I'm driven by curiosity, and I see this internship as a unique opportunity to grow technically and professionally while making meaningful contributions.

Thank you for considering my application. I would be thrilled to join Microsoft's internship program and bring my energy, creativity, and determination to your team.

Sincerely, Krishna Mewara
